Education

Noida Institute of Engineering and Technology

B.Tech in Information Technology **CGPA: 9.01**

2021 – 2025

Greater Noida, UP

Experience

QualtechEdge [↗](#)

AI Engineer

Nov 2025 – Present

Noida

- Designed a **LangGraph**-based react-agent **voice loan advisor** using **LiveKit**, **LLMs**, and **FastAPI**, enabling end-to-end automated loan journeys.
- Built and integrated** multiple middleware and external APIs, including government and partner APIs, with robust **fault tolerance**, **retry logic**, and validation mechanisms.
- Developed** the agent's complete tool ecosystem, containerized services with **Docker**, and deployed scalable workflows on **AWS**.
- Collaborated** closely with product and engineering teams to optimize system architecture, improve response accuracy, and enhance overall agent reliability.

Microsoft [↗](#)

Software Engineer Intern

June 2024 – August 2024

Noida

- Integrated** an **audio panel** into the **Microsoft Designer** editor using **React** and **FluentUI v9**, enabling **audio content creation** and **MP4 export** functionality.
- Redesigned** the panel UI based on **UX feedback** reducing **user friction** by **20%** and improving overall usability.
- Collaborated** with **Design** and **Accessibility (A11y)** teams to enhance **interface performance** and ensure **WCAG-compliant accessibility**.

Projects

ARGUS [↗](#)

- Architected** an AI agent authorization gateway using **Gemini Flash/Pro**, **FastAPI**, and **React** that intercepts LLM tool calls and enforces intent-based policies pre-execution — preventing prompt injection and PHI exfiltration.
- Built** a multi-layer AI pipeline (Intent Extraction → Policy → Analysis) with **Lobster Trap DPI**, **async SQLAlchemy**, **Redis** caching, and SSE live monitoring — processing actions in under 50ms.
- Designed** a human-in-the-loop review queue with compliance export (CSV/JSON/PDF), backed by **136 tests** and **HIPAA-ready audit trails**

AuthoGraph AI [↗](#)

- Built** a **multi-agent AI system** using **LangGraph** with a Plan–Execute–Distribute workflow to autonomously research and publish technical blogs across Dev.to, Hashnode, LinkedIn, and Medium in under 5 minutes.
- Designed** a **RAG pipeline** with **Tavily Search**, vector retrieval, and **LangSmith** monitoring, achieving 95%+ factual accuracy via automated LLM-based evaluation.
- Developed** a full-stack platform (**FastAPI + React**) with SSE-streamed agent reasoning, **GPT-4o-mini** and **Gemini 2.5 Flash** integration, deployed on **AWS EC2** with a credit-based monetization system via Razorpay.

AI & Technical Skills

Programming: Python

LLMs & Agents: Multi-Agent Systems, Autonomous Agent Architectures, RAG, Prompt Engineering, LangChain, LangGraph, CrewAI, LLM Evaluation, LLM Observability

ML & Training: PyTorch, Hugging Face, LoRA/QLoRA, PEFT, Fine-Tuning, Model Serving (vLLM)

Infrastructure: FastAPI, Async Python, PostgreSQL, FAISS, ChromaDB, Pinecone, Redis

Cloud & DevOps: AWS (EC2, S3, ECS), Docker, Kubernetes, GitHub Actions, LangSmith
